

# Mysteries of the World - Stonehenge

## Activity 3

You are going to create a physical or visual representation of your impressions of Stonehenge. A physical representation means the construction of a three-dimensional piece, such as a model using clay, paper mache or other materials of your choice. A visual representation is a sketch, painting or collage using paint, magazine pictures, markers, etc.. A representation does not mean that you will have to recreate Stonehenge exactly as it appears. You can do this if you wish, or you can represent Stonehenge in a more abstract way, meaning that you use art to present your feelings and ideas about Stonehenge.

We will be taking class time to start this project and you will complete it at home. Please think about this project and some ideas you have about it as you are working on the other activities.
