

Accessing Students Achieve

Accessing or Creating a Parent Login:

- **If you know your student's username and password** you can enter Students Achieve with their login. Go to the [SAS login page](#), login with your student's login, click "Add a Parent", select your name from the contact list or create a new login and enter your e-mail address. Your own username and password will be e-mailed to you. You can change your password to something more user friendly after you login for the first time.
- Parents can also contact the school to request an SAS login. You will need to provide the following information:
 - Name of student
 - Name of parent requesting
 - Parent e-mail address
- Please note: if a parent login is requested and the parent has not been entered as a parent contact in our school records, the request may be denied.

Accessing Student Logins:

- Early in the semester the course teachers will provide SAS usernames and passwords for first time users. Students should then enter their own e-mail address when they log in. Passwords can be changed by the student.
- If a student has lost or forgotten their SAS login they can one of their teachers e-mail it to them. The teacher can enter the e-mail address into Students Achieve and e-mail the username and password to the student.

The Value of Accessing Students Achieve:

- Students Achieve allows the student and parent to access attendance information efficiently. The attendance is entered by the teacher each day, often during the class period. This allows the parent to track attendance and address issues with their students more effectively.
- Please Note: Teachers enter attendance at the earliest opportunity. Delays in entering are expected when a teacher is absent from school or unable to enter attendance for other reasons.
- Many teachers use Students Achieve to record test and assignment marks in their courses. This allows the student and parent to have an ongoing progress report.
