

Morell High Creative Multimedia - Digital Imaging Section

Assignment # 5 - "Enhance Quality" Assignment

Fireworks is digital software that lets you enhance the quality of digital photographs. Please refer to the handout on Image Restoration to help you through the following assignment.

Assignment

Scan or find an old or damaged photo and restore it using digital techniques such as cloning, changing brightness and contrast.

You are encouraged to locate an old family photo and work with it, but if this is not possible, you may choose from one of the photos that are available on the Course Image Collection CD. (See Mr. Cheverie)

Assignment particulars:

Create a folder in L:\MMshared\Your folder\Digital Imaging and name it OLD

The folder should only contain only two images.

**The original image that you began the project with and
The completed image after your restoration.**

Please name each file appropriately.

Send an email to the class email account with the subject: Assignment 5 Completed.
