Daylily Garden Flyer

Pone: (906) 482-4570
105 Huron Street
Houghton, Michigan
49931-2194
Now is a good time to divide your daylily bed. Daylily beds should be divided or thinned if it has been five years since the last thinning or
1) last year the bed produced lots of foliage but fewer blooms than the previous year.

How to make a plant donation to the library:
Daylilies
1) Thin your daylily bed and separate out the extras for the library.
2) Leave some soil surrounding the roots of the bulbs, taking care not to damage the bulbs or root hairs.
3) Place the bulbs in plastic or paper bags for transporting
4) Label your donation with as much information as you have. We would find it helpful to know the varietal name. Plant height, and bloom color and any additional information you have on the daylily donation you are bringing in.
5) Take your donation to the Portage Lake District Library within one or two days of digging the bulbs.

Vinca Minor (also known as myrtle or periwinkle)
1) Take five to seven inch cuttings from plants.
2) Place in a glass of water on your window sill until root hairs begin to grow.
3) Transfer the cuttings to a disposable cup.
4) Take your donation to the Portage Lake District Library
